

OWP 2013 AD RATE CARD

Oregon Wine Press — then named Oregon Wine Calendar — was started in 1984 by Portland-area natives Richard Hopkins and Elaine Cohen. In 2006, the magazine was acquired by News-Register Publishing Co., a fourth-generation, family-owned publishing company, which is located in McMinnville, Oregon.

From its base in the lush Yamhill Valley, Oregon Wine Press continues the long tradition of excellence established by its founders.

Oregon Wine Press is a free publication available at over 600 locations throughout Oregon and nationwide. It is also available by subscription. Monthly distribution ranges from 22,000 to 25,000.

Acceptable File Formats

PDF (Portable Document Format) is the preferred format for ads. Most current graphics and page layout applications allow you to save or export your document as a PDF.

PDF Requirements

- Save as Press Quality OR PDF/X-1^a.
- Select Acrobat 4.0 Compatibility.
- Embed all fonts.

Illustrator/Freehand EPS Requirements

- Embed all graphics.
- Convert fonts to Outline (Illus.) or to Paths (FH).

Unacceptable Formats

JPEG, BMP, GIF, and PNG formats are designed for web graphics and are not acceptable for print. Word, Works, and Publisher files are not acceptable for quality press output. • Quark, InDesign, and PageMaker native file formats are not accepted—Oregon Wine Press does not accept outside fonts. Please export your ad as a PDF with

graphics and fonts embedded. Photoshop files are raster based. This means if they need to be resized their quality will deteriorate. Photoshop EPSes are also not ideal for text unless they are saved at 600 dpi or higher, which increases file size.

Graphics and Color

- For best results, use resolutions of 240 dpi (dots per inch) for black and white photos, 300 dpi for color photos, and 800 dpi for line art.
- Please use TIFFs and EPS graphics in layouts.
- Indexed Color is not acceptable. Indexed Color is designed for web use only and will not separate correctly.

Black and White Ads

- Four-color black (aka: Registration) is not acceptable.
- Black and white (also known as Grayscale) ads must not contain any CMYK, RGB or spot colors.

Spot Color Ads

- Spot colors must be selected from the Pantone Matching System (PMS) Uncoated catalog.
- When designing a spot-color ad do not include any CMYK or RGB elements in the ad.

Process Color Ads

- All graphics/photos must be specified as CMYK. RGB is not acceptable.
- Spot colors must be converted to CMYK.
- Four-color black text (Registration or Rich Black) is not acceptable in any case.
